

Look! No "Wild Cats" Here

GULF COASTAL OIL LANDS

Brazoria County

In the Gulf Coastal Oil Belt—of Texas—Produces one-tenth of the total oil production of that state—coming from about 12 wells.

—And—

THINK OF IT

This production of 9,475,000 barrels for 1919, comes from its present defined gusher oil pool area, at West Columbia, which does not exceed 35 acres—and estimated for 40,000 barrels daily—with production constantly increasing.

NINE TENTHS

of the remaining oil production, 97,000,000 bbls., comes from a defined area of 700 sq. miles—covered by 3,723 wells—and Brazoria county is the greatest virgin gusher oil field in Texas today.

"Stratton Ridge" Oil Dome

Brazoria County, Texas

Stop, Think and Act Quickly for
this is Your Opportunity

Brazoria County, from an oil producing standpoint, is less than two years old. West Columbia is its present pool. Among the legitimate oil giants operating in this pool are:

THE TEXAS COMPANY
SINCLAIR CONSOLIDATED, GULF PRODUCTION COMPANY,
SUN COMPANY, CROWN OIL & REFINING COMPANY,
HUMBLE OIL & REFINING COMPANY,

Who represent almost one billion dollars capital

Imminent Oil Geologists

Identified with the oil business, after several years of search, claim that the greatest of all oil pools—

"THE MOTHER POOL"

has yet to be found in the Gulf Coastal Oil Belt—and it is conceded by most all that

"STRATTON RIDGE"

ABOUT 12 MILES SOUTHEAST OF WEST COLUMBIA, IS THE
MOTHER POOL"

Right now the development is intense. Acreage in land and leases, is soaring "sky high" without abatement; and this since Edward Smith and others were on the ground, Wednesday, December 17, when the Freeport Sulphur Company's "Dannenbaum Well" plunged into the big 60-foot pay sand at 1160 feet—and which is good for a mighty gusher when completed. The same legitimate oil giants, including minor others, as shown above, are operating at Stratton Ridge.

WITH A 1-8 ROYALTY ON THE PERPETUAL PRODUCTION OR BETTER, WITHIN SEVERAL MONTHS

GULF COASTAL OIL LANDS

Brazoria County

In addition to its vast Reservoir
Oil Resources,

PRODUCES

Commercial Sulphur valued at millions of dollars annually. Its value at Hoskin's Mound, just east of us, is estimated for the Texas Company alone, at \$130,000,000.00, with 1,000,000 barrels of oil produced to date.

This Sulphur is produced by the Freeport Sulphur Company, (whose assessed valuation by the county is \$5,300,000.00), and the Texas Company—and the value of Sulphur as a commodity is greater than oil.

FACTS

\$101,000.00 IN 15 DAYS!

Frank Gillespie received a check for his half of the oil from one well during a period of 15 days of \$101,000.00 and was offered a million for his half interest in the lease and well, which he refused.

\$218,750.00 FOR ONE-HALF
OF A LOT!

That's what J. B. Cicero of San Antonio, Texas, received for his holding in the Humble Field. Former Attorney General (Texas) Jewel P. Lightfoot, paid \$84,000 per acre for a small tract near West Columbia Field.
